

# Remote Patient Monitoring *Simplified*

## Seamless Vitals Capture Zero Setup Hassle

The Cellular Home Vitals Gateway is a plug-and-play solution designed to simplify remote patient monitoring across a wide range of care needs - from post-acute recovery to chronic condition management. With no apps, Bluetooth pairing, or WiFi required, this cellular hub automatically connects to leading Bluetooth-enabled devices, capturing and transmitting vitals data securely and in near-real-time. It supports multiple device types and top brands, making it fast to deploy at scale and effortless for patients and clinicians alike.

### *Simple for Patients*

- Easy to use
- Connects instantly
- No need for pairing, WiFi or Apps

### *Simple for Care Providers*

- Easy to Deploy
- Fits existing workflows
- Receive data securely in any EHR

## How it works

- 1 Plug in the Hub**  
The vitals hub will find the best cellular network.
- 2 Take Vitals Readings**  
No pairing. No other mobile device is needed.
- 3 Data is transmitted where it's needed**  
Data accessed in the Life365 monitoring portal or EHR system.

*It just works! Friction points removed. Get started quickly.*

# Increase revenue. Improve patient care. Increase adherence.

Increase revenue through billable RPM CPT codes with a solution that's simple to scale and deploy.

Improve patient outcomes with continuous care management that enables proactive interventions and better engagement.

Boost adherence through an easy-to-use, no-touch design that encourages consistent device use and supports better self-care at home.

## CPT Codes

### RPM Reimbursement Opportunities

#### Code 99453 • \$19.73

One-time reimbursement for initial set-up and patient education on use of equipment / technology for remote physiologic monitoring treatment management services.

#### Code 99454 • 43.03

Reimbursement of remote monitoring equipment / technology to patients for transmission of readings, alerts / notifications via electronic means – once every 30 days.

#### Code 99457 • \$47.88

Remote physiologic monitoring treatment services / interactive communication between patient & caregiver during a calendar month – initial 20 minutes.

#### Code 99458 • \$38.50

Remote physiologic monitoring treatment services / interactive communication between patient & caregiver during a calendar month – each additional 20 minutes.

*\*Rates are based on 2025 non-facility national averages and vary by region.*

## Addressing Needs for Vulnerable Patients

# 43%

of lower income Americans lack at-home broadband

# 41%

of Medicare beneficiaries lack smartphones

## Connected Care for Every Patient

Remote monitoring powered by 40+ cellular-enabled devices—and counting.

*These devices are sourced from trusted brands like Tenovi, Omron, A&D Medical, Nonin, Trividia, and more, ensuring accuracy and reliability across diverse patient populations and a wide array of conditions.*
