

# Stay Connected Anywhere

No syncing.  
No apps.  
It just works.

## Cellular-Enabled Medical Devices from Life365

### Simple, Seamless Remote Monitoring

Life365 makes it easier to stay connected with patients at home using medical devices equipped with built-in cellular technology - no smartphones, apps, Bluetooth pairing, or Wi-Fi required.

Whether supporting seniors, rural populations, or patients with limited tech experience, devices are designed to remove barriers and deliver clinical-grade data automatically and reliably.

#### Available Cellular-Enabled Devices

**Blood Pressure Monitor** - One-touch operation with built-in cellular. Measures systolic, diastolic, and pulse rate.  
*(Multiple cuff sizes are available to accommodate a range of patients).*

**Body Weight Scale** - Stand on the scale and transmit weight data instantly. Reinforced with tempered glass, non-slip surface, and supports up to 450 lbs (200 kg).

**Pulse Oximeter** - Spot-checks blood oxygen levels and pulse, auto-transmitting results in seconds.

**Glucose Meter** - Capture blood glucose readings and send them to the cloud automatically.

### Why Choose Cellular Devices?

- **Zero Setup:** Just power on and take a reading
- **Fast Data Transmission:** Sent directly to Life365's secure cloud or your preferred platform via API
- **Clinician-Trusted:** Proven in care programs across the U.S.
- **Scalable & Secure:** Ideal for RPM, chronic care, and at-risk populations

## Reliable Data, Every Time

Life365 cellular-enabled devices are engineered in the USA to ensure a premium experience for patients and providers. We know that defective devices cause frustration, patient drop-off, and missed insights - so we don't compromise on quality or connectivity.

## The Results Speak for Themselves

Increase revenue. Improve patient care.  
Increase patient adherence.

## Support & Services

When implementing a Remote Patient Monitoring (RPM) solution, having a comprehensive, full-service approach ensures the foundation for a successful program.

*EHR & Software Integration*

*Optional Clinical Monitoring Services*

*Distribution & Delivery*

*Technical Support*

## About Life365

With over 20 years of experience in developing remote monitoring solutions, Life365 helps healthcare organizations seamlessly capture biometric data from patients at home. Our easy-to-use technology empowers care teams to deliver proactive, virtual care and supports patients in better managing their health.
