More Options.
The Difference is Simplicity.

Life365 Offers a New Way to Simplify RPM Connectivity.

One solution doesn't fit all.

The Life365 Virtual Care Platform enables care providers and patients to stay connected and share actionable health data with care teams through our flexible Remote Patient Monitoring (RPM) solutions. Downloadable apps for self-managed patients, turn-key telehealth for virtual care, along with technical and clinical support options.

From health & wellness programs – to chronic care management for Medicare / Medicaid populations – the Life365 Team continually strives to bring more options to address the diverse demands of the expanding RPM market.

Life365 now offers a new Vitals Hub to provide even more simplicity and flexibility, in addressing the growing needs of patient populations that can benefit from managing their health at home.

Simple.

**Bluetooth +
Cellular
Home Hub
for Vitals**

Simple for Patients

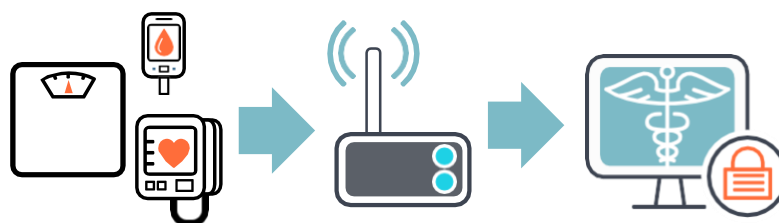

- Easy to use.
- Connects instantly.
- No need for pairing, WiFi or Apps.

Simple for Care Providers

- Easy to Deploy.
- Fits existing workflows.
- Receive data securely in any EHR.

▶ How it works.

- 1 Plug in the Hub.**
The vitals hub will find the best carrier.
- 2 Take vitals readings.**
No pairing. No other mobile device needed.
- 3 Data is transmitted where it's needed.**
Data accessed in the existing workflow, EHR system.

It just works.

Friction points removed. Get started quickly.

More Ways to Connect.
The Difference is Flexibility.

Flexible, best-fit solutions for patients – and provider practices.

Life365 already offers hundreds of integrated healthcare solutions on one platform – and with the Home Hub, we offer even more options to connect our clients with their patients at home – with the right RPM tools that best fit their populations’ needs and comfort with technology.

Addressing More Disease States

- Asthma
- Bariatrics
- CHF
- COPD
- Diabetes
- Hypertension
- COVID Care: Short / Long Term
- Organ Transplant
- VAD
